# Contents

# Introduction

L<sup>A</sup>T<sub>E</sub>X is hard! The best reference I have found is the Wiki.<sup>1</sup> My purpose is to write a reference for my future use of L<sup>A</sup>T<sub>E</sub>X. The following is the basic structure needed to start a document.

```
\documentclass{article}
\begin{document}
Hello world!
\end{document}
```

The ‘Hello world!’ is essential.

## Text Foratting

use the `usepackage(setspace)` package:

```
\begin{doublespace}
  This paragraph has \\ double \\ line spacing.
\end{doublespace}

\begin{spacing}{2.5}
  This paragraph has \\ huge gaps \\ between lines.
\end{spacing}
```
